Global Optimization Toolbox MATLAB

June 21st, 2018 - Global Optimization Toolbox provides functions that search for global solutions to problems that contain multiple maxima or minima The toolbox includes global search multistart pattern search genetic algorithm multiobjective genetic algorithm simulated annealing and particle swarm solvers'

'Hill climbing Wikipedia

June 21st, 2018 - In numerical analysis hill climbing is a mathematical optimization technique which belongs to the family of local search It is an iterative algorithm that starts with an arbitrary solution to a problem then attempts to find a better solution by making an incremental change to the solution'
